

**Are your medications
affecting
Your HORMONES?
Your MENSTRUAL CYCLES?
Your OVARIES?**

If you are a woman aged 18-45 with Bipolar Disorder,
and are taking Depakote, Lithium, Tegretol,
Lamictal, Neurontin, or Topamax,
you may be eligible for a study to evaluate
your medication's effect on your
hormones, menstrual cycles, and ovaries.

Women who participate in this study will be compensated up to \$80 for
their efforts, which includes 1-2 brief study visits to complete
questionnaires, one blood test, a skin examination, and an ultrasound
evaluation of their ovaries.

For information, contact Macy Woodside at (503) 220-8262 ext. 56198.
